Hello, I'm

Matimu Mabunda

Graphic Designer

I am an ICT (Multimedia) student specialising in graphic design, with a passion for creating professional, branding, and visual communication solutions for digital and print media.

About Me

Learn more about my journey, skills, and passion for creating visual identities.

I have a strong interest in graphic design, branding, and visual communication. I enjoy transforming ideas into creative and engaging designs that effectively communicate messages and strengthen brand identity.

My academic journey has strengthened my skills in branding, typography, layout design, and digital media, allowing me to create creative, professional, and visually engaging designs for both print and digital platforms.

My Skills

Brand Identity & Logo Design

Visual Communication

Typography & Print Design

Adobe Creative Suite (Illustrator, Photoshop & InDesign)

Professional Goals

My professional goal is to secure an internship or junior position in the field of graphic design, with a focus on branding, visual identity, and digital design. Through these opportunities, I aim to gain industry experience, collaborate with experienced designers, and further develop my skills in creative problem-solving, visual communication, and professional design practices.

My Vision

To be professional graphic designer who creates innovative and meaningful visual solutions for businesses in South Africa and globally.
To develop strong brand identities, engaging marketing materials, and visual communications that strengthen brand recognition and effectively connect with audiences.

My Projects

A selection of projects that demonstrate my skills in digital branding.

Mabunda Matimu Studio

A professional brand guideline developed to ensure visual consistency across digital and print materials.

This project taught me the importance of consistency in branding and design. I initially chose colours based on appearance, but later learned some combinations failed accessibility contrast standards. After researching, I improved the colour palette to ensure better readability and usability across different platforms.

The design system principles from this project influenced the visual structure of my portfolio, including colour hierarchy and typography.

View Project

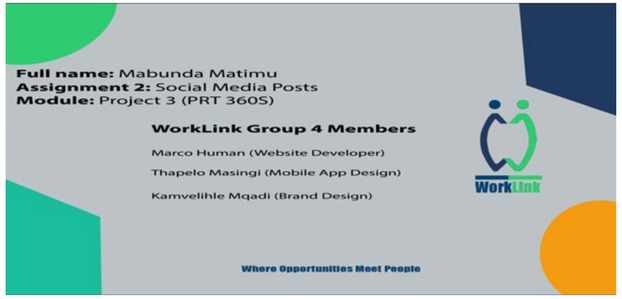

Fabiani Summer Campaign

A personal project created as part of my interview presentation to develop a premium summer campaign for Fabiani at TFG Foschini for Graphic Design Internship.

The objective was to reposition the brand through a sophisticated visual identity that reflected modern luxury, timeless craftsmanship, and premium menswear.

This project improved my graphic design and branding skills by developing a cohesive visual identity and consistent campaign across multiple platforms.

View Project

Social Media Marketing

WorkLink is an online employment platform connecting job seekers with employment opportunities in Cape Town.

I worked on social media planning and content creation, focusing on target audiences and the platforms they use, including Facebook, Instagram, TikTok, and LinkedIn.

This project improved my skills in social media planning, audience segmentation, content creation, and digital marketing.

View Project

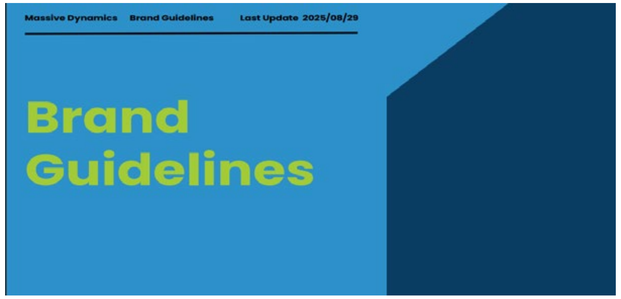

WaterWatch Logo

WaterWatch is a mobile application that connects with water-monitoring sensors to provide live information about water usage, leakages, and wastage.

For this group assignment, I designed the WaterWatch logo and contributed to its visual identity. The eye shape represents monitoring, while the water-drop icon represents water. The blue colour palette communicates water, trust, and technology, supported by the tagline “Every Drop Counts.”

This project strengthened my skills in graphic design, branding, visual communication, colour selection, typography, and logo design.

View Project

Massive Dynamics Branding

A branding design project created for Massive Dynamic as part of my second-year university assignment.

This project taught me how to present a complete branding system to a client using clear rules like colour codes, typography, and logo spacing. The biggest challenge was creating a scalable design that worked across different formats, from business cards to large displays. If I improved it, I would include more realistic mockups to show how the brand works in real-world applications.

The structured branding approach used here influenced the visual identity and design decisions applied in the Mabunda Matimu Studio.

View Project

WorkLink Logo

WorkLink is a university group project developed to address unemployment and improve job accessibility in Cape Town.

My contribution focused on designing the WorkLink logo and visual identity. The logo represents the connection between employers and employees through two abstract figures, while the slogan, “Where Opportunity Meets People”, reflects the platform’s purpose of bringing people and employment opportunities together.

This projects demonstrating how design can be used to solve real-world challenges.

My Services

I offer to help individuals and businesses build effective digital and visual experiences.

Branding & Visual Identity

I create unique brand identities, including logo design, colour palettes, typography, and brand guidelines that help businesses establish a strong and memorable visual presence.

Print & Marketing Design

I design creative marketing materials such as posters, flyers, brochures, business cards, banners, and social media graphics that communicate ideas clearly and effectively.

Digital Design

I create visually engaging digital content for social media, advertisements, presentations, and other digital platforms, ensuring consistency across all brand touchpoints.

Tools

Adobe Illustrator

Adobe Photoshop

Adobe InDesign

Figma

Canva

Typography

Brand Identity Design

My Work Process

I offer to help individuals and businesses build effective digital and visual experiences.

1. Research & Discovery

Understanding the client's goals, target audience, and brand vision to establish a clear design direction.

2. Concept Development

Creating mood boards, sketches, and visual concepts to explore creative ideas and develop a strong brand identity.

3. Design & Refinement

Designing logos, branding materials, and visual assets while refining typography, colour, and layout for consistency.

4. Final Delivery

Preparing high-quality files for print and digital platforms, ensuring the final designs meet professional standards.

Why Choose Me

Strong branding and visual identity design
Creative thinking and visual problem-solving
Attention to detail and design consistency
Proficiency in typography, colour, and layout design
Effective communication and collaborative teamwork
